

EMPLOYEE NOTICE

10/25/2010

Dear Employee:

In accordance with the Asbestos Hazard Emergency Response Act of 1986 (AHERA), the facility in which you work has been re-inspected and a Management Plan updated for the control of any asbestos-containing material (ACM) found in your building. The Inspection Report/Management Plan was completed by a certified consulting firm: Tackett Environmental Services of Springboro, Ohio.

A copy of the Management Plan for each individual school building is located in the Main Office of each school and in the Building Maintenance Supervisor's Office for your review. Also, please be advised that information regarding any inspection/re-inspections, response actions, and post response action activities are also included in the Management Plan and is available for your review.

It is significant to report to you that our district will manage the ACM in our buildings in accordance with AHERA. Our first and foremost goal with asbestos is management control. Management procedures are in effect to control the asbestos exposure, and the cooperation of students and staff is most critical in this process.

All ACM should and will be disturbed only in accordance with the AHERA regulations. Please feel free to contact me if you have any questions.

Chuck Bostic
Maintenance Supervisor
Carlisle Local Schools
